Reflecting Telescope Optics - Raymond N. Wilson 2013-03-09 This is the first volume of a monumental work that will provide a complete treatment of all theoretical aspects of reflecting telescope optics. It addresses all specialists in the field, both within the astronomical community and in industry, and, consequently, particular emphasis is placed on subjects such as practical alignment, test techniques, and maintenance aspects. Whereas the second volume will concentrate on technical aspects and modern developments, this one is devoted to the theory of reflecting telescope optics and, together with the historical development, it will also prove to be useful to students. This book has real classic potential.

History of Astronomy - John Lankford 2013-03-07 This Encyclopedia traces the history of the oldest science from the ancient world to the space age in over 300 entries by leading experts.

Journal of the Society of Glass Technology - Society of glass technology, Sheffield, Eng 1940
