Administrative Law-Ronald A. Cass 2020-02-02 Administrative Law: Cases and Materials is the product of a longstanding collaboration by a distinguished group of authors, each with extensive experience in the teaching, scholarship, and practice of administrative law. The Eighth Edition preserves the book’s distinctive features of functional organization and extensive use of case studies, with no sacrifice in doctrinal comprehensiveness or currency. By organizing over half of the book under the generic administrative functions of policymaking, adjudication, enforcement, and licensing, the book illuminates the common features of diverse administrative practices and the interconnectedness of otherwise disparate doctrines. Scattered throughout the book, case studies present leading judicial decisions in their political, legal, institutional, and technical context, thereby providing the reader with a much fuller sense of the reality of administrative practice and the important policy implications of seemingly technical legal doctrines. At the same time, the Eighth Edition fully captures the headline-grabbing nature of federal administrative practice in today’s politically divided world. New to the Eighth Edition: New insight into the thinking of the Supreme Court’s newest Justices on crucial separation-of-powers questions (especially in excerpts from the Gundy, Kisor, and PHH cases) Multiple excerpts from the controversial citizenship-question Census case Excerpts of judicial responses to Trump Administration initiatives in immigration and environmental law Multiple excerpts from the DAPA case (Texas v. US), as a platform for considering the fate of the DACA program and other immigration controversies Comprehensive updates of materials on Chevron deference, arbitrary-capricious review, substantial evidence review, reviewability of agency action, the appointment and supervision of ALJs, and presidential oversight of rulemaking Professors and students will benefit from: The “case study” approach that illuminates the background policy and organizational contexts of many leading cases. The functional organization of materials in Part Two which enable instructors to show how doctrinal issues are shaped by functional context. Theoretical materials presented at the beginning of the book that provide a useful template for probing issues throughout the course. A text that is designed to be easily adaptable for use as an advanced course and in schools that have a first-year Legislation and Regulation course. Units that are organized so that many class sessions can focus on a single leading case, reducing the problem of “factual overload” that characterizes many administrative law courses. The case study approach that helps students understand the context within which doctrinal issues arise and the way in which those issues affect important matters of public policy. Reorganization of Part Two to convey a deeper understanding of the characteristic functions performed by administrative agencies.

The International Politics of Ebola-Anne Roemer-Mahler 2018-10-11 The outbreak of Ebola virus disease that gripped Liberia, Guinea and Sierra Leone through much of 2014 and 2015 was undoubtedly a health emergency, yet it was also a global political event. This book examines the international politics of the Ebola outbreak in all of its dimensions, critically assessing the global response, examining what the outbreak can tell us about contemporary global health governance, and examining the inequalities and injustices that were laid bare. In doing so, the book shows how some of the concepts, debates and findings from the growing field of global health research in International Relations can help both in furthering understanding of the Ebola crisis and also in improving policy responses to future infectious disease outbreaks. This book was originally published as a special edition of Third World Quarterly.

Constitutional Politics in Multinational Democracies-André Lecours 2021-07-15 Constitutional politics is exceptionally intense and unpredictable. It involves negotiations over the very nature of the state and the implications of self-determination. Multinational democracies face pressing challenges to the existing order because they are composed of communities with distinct cultures, histories, and aspirations, striving to coexist under mutually agreed-upon terms. Conflict over the recognition of these multiple identities and the distribution of power and resources is inevitable and, indeed, part of what defines democratic life in multinational societies. In Constitutional Politics in Multinational Democracies André Lecours, Nikola Brassard-Doen, and Gay Lafleure bring together experts on multinational democracies to analyze the claims of minority nations about their political future and the responses they elicit through constitutional politics. Essays focus on the nature of these states and the actors and political process within them. This framework allows for a multidimensional examination of crucial political periods in these democracies by assessing what constitutional politics is, who is involved in it, and how it happens. Case studies include Catalonia and Spain, Puerto Rico and the United States, Scotland and the United Kingdom, Belgium, Bosnia and Herzegovina, and Quebec and the Métis People in Canada. Theoretically significant and empirically rich, Constitutional Politics in Multinational Democracies is a necessary read for any student of multinationalism.

Who's who in Law
Law and Global Health-Michael Freeman 2014 Current Legal Issues, like its sister volume Current Legal Problems (now available in journal format), is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and analyses points of controversy in the use, and abuse, of extra-legal arguments within legal theory and practice. Law and Global Health, the sixteenth volume in the Current Legal Issues series, offers an insight into the scholarship examining the relationship between global health and the law. Covering a wide range of areas from all over the world, articles in the volume look at areas of human rights, vulnerable populations, ethical issues, legal responses and governance.

Sharia Law and the Arab Oil Bust-Glenn L. Roberts 2007 The delay in development of the Islamic world, in defiance of the formulaic approaches long favored by economists, suggests that the traditional Shari'a and Islamic values and principles are at least partially responsible for the region's persistent backwardness. By analyzing the impact of the legal regime of the Shari'a on Saudi Arabia during the Arab Oil Bust of the 1980s, this thesis concludes that Islamic social values and the Shari'a's de facto role as an uncodified pre-emptive Arab common law implemented with high regard to precedent by ulama with extraordinary power of judicial review had the effect of accentuating the effects of the Oil Bust, making the theory of the Petrocourse a subset of a larger Cost of Being Muslim. On the other hand, the author concludes that not only is the Shari'a not constrained by its nature to playing a deleterious economic role, but that it has broad commercial application, both domestically and internationally, and a new generation of more flexible Muslim economists, lawyers, and financial theorists have pointed the way toward a possible comprehensive modern adaptation of Islamic laws and principles.

The Law Times-1849

Law and Citizenship-Law Commission of Canada 2011 The essays in Law and Citizenship provide a framework for analyzing citizenship in an increasingly globalized world by addressing a number of fundamental questions. How are traditional notions of citizenship erecting borders against those who are excluded? What are the impacts of changing notions of state, borders, and participation on our concepts of citizenship? Within territorial borders, to what extent are citizens able to participate, given that the principles of accountability, transparency, and representativeness remain ideals? The contributors address the numerous implications of the concept of citizenship for public policy, international law, poverty law, immigration law, constitutional law, history, political science, and sociology.

Transdisciplinary Perspectives on Childhood in Contemporary Britain-Sandra Dinter 2017 In the light of the complex demographic shifts associated with late modernity and the impetus of neo-liberal politics, childhood continues all the more to operate as a repository for the articulation of diverse social and cultural anxieties. Since the Thatcher years, juvenile delinquency, child poverty, and protection have been persistent issues in public discourse. Simultaneously, childhood has advanced as a popular subject in the arts, as the wealth of current films and novels in this field indicates. Focusing on the late twentieth and the early twenty-first centuries, this collection assembles contributions concerned with current political, social, and cultural dimensions of childhood in the United Kingdom. The individual chapters, written by internationally renowned experts from the social sciences and the humanities, address a broad spectrum of contemporary childhood issues, including debates on child protection, school dress codes, the media, the representation and construction of children in audiovisual media, and literary awards for children's fiction. Appealing to a wide scholarly audience by joining perspectives from various disciplines, including art history, education, law, film and TV studies, sociology, and literary studies, this volume endorses a transdisciplinary and meta-theoretical approach to the study of childhood. It seeks to both illustrate and dismantle the various ways in which childhood has been implicitly and explicitly conceived in different disciplines in the wake of the constructivist paradigm shift in childhood studies.
