**Reconceptualizing Teacher Education** Anne M. Phelan 2020-01-14 In this collection, Canadian scholars articulate a response to their collective concerns about the impact of global policy on teacher education, provoking a far-reaching dialogue about teacher education in and for our times. The first two decades of the new millennium have witnessed unprecedented appraisal, analysis, and educational policy formulations related to teaching (K–12) across the Western world. In turn, teacher education has been greatly impacted, as governments around the world see the reform and management of teacher education as a key component in restructuring education toward greater economic competitiveness. The result has been an unwarranted and undesirable level of standardization. It is vital to the future of teacher education, and concomitantly public education, that we imagine alternatives to the homogenization of the educational
experience that globalizing policies install. What is needed are vocabularies that enable educators and teacher educators to discern and articulate educational purposes beyond capital and which focus on the kinds of educational experiences that can help prepare the young to lead good and worthwhile lives. Using lessons learned from the Canadian context, the authors identify and investigate the importance of initial and continuing professional education that fosters teachers’ intellectual freedom and study; advances an informed and critical appreciation of civic particularity and historical circumstance; and cultivates ethical (i.e., pedagogical) engagement with ideas and histories—teachers’ own and their students—as crucial themes of teacher education globally. This book is published in English - Les chercheurs canadiens qui ont participé à cet ouvrage collectif proposent une réponse à leurs préoccupations collectives qui portent essentiellement sur l’impact de la politique globale sur la formation des enseignants, et ce, afin d’établir un dialogue franc et approfondi sur la formation des enseignants telle que pratiquée à notre époque. Durant les deux premières décennies du nouveau millénaire, le monde occidental a connu une augmentation sans précédent des analyses, des évaluations et des propositions les plus diverses portant sur la politique éducative (du jardin d’enfant à la fin du secondaire). En conséquence, la formation des enseignants a été très fortement impactée dans un contexte global où les gouvernements considèrent la réforme et la gestion de la formation des enseignants comme une composante clef de la restructuration de l’enseignement, et ce, afin que l’enseignement dispensé soit plus compétitif sur le plan économique. Force est de constater que cette approche s’est traduite par un niveau de standardisation indésirable et totalement injustifié. Pour garantir l’avenir de la formation des enseignants et donc de l’éducation publique, il est aujourd’hui fondamental d’imaginer des alternatives à l’homogénéisation de l’expérience éducative, qui résulte des politiques adoptées dans le cadre de la mondialisation. Dans cette perspective, il est nécessaire de fournir aux enseignants et aux éducateurs un vocabulaire et une terminologie spécifiques qui leur permettent de définir et d’articuler leurs objectifs éducatifs, au-delà de la notion réductrice de capital, tout en privilégiant les différents types d’expérience éducative qui préparent les jeunes à mener des vies satisfaisantes et utiles. En s’inspirant des enseignements tirés du contexte canadien, les auteurs de cet ouvrage ont identifié et évalué l’importance d’une éducation professionnelle initiale et qui continue de favorisé l’apprentissage et la liberté intellectuelle des enseignants ; promeut une appréciation critique et informée des spécificités civiques et des circonstances historiques ; et favorise un engagement éthique (et donc pédagogique) qui prend en compte les idées et les antécédents des enseignants et de leurs élèves et les considèrent comme des thèmes cruciaux de la formation globale des enseignants. Ce livre est publié en anglais.

Christian Moral Theology in the Emerging Technoculture-Brent Waters 2016-05-23 We are living in an emerging technoculture. Machines and gadgets not only weave the fabric of daily life, but more importantly embody philosophical and religious values which shape the contemporary moral vision—a vision that is often at odds with Christian convictions. This book critically examines those values, and offers a framework for how Christian moral theology should be formed and lived-out within the emerging technoculture. Brent Waters argues that technology represents the principal cultural background against which contemporary Christian moral life is formed.
Addressing contemporary ethical and religious issues, this book will be of particular interest to students and scholars exploring the ideas of Heidegger, Nietzsche, Grant, Arendt, and Borgmann.

**From Human to Posthuman**-Brent Waters 2016-04-22 Technology is one of the dominant forces shaping the emerging postmodern world. Indeed the very fabric of daily life is dependent upon various information, communication, and transportation technologies. With anticipated advances in biotechnology, artificial intelligence, and robotics, that dependence will increase. Yet this growing dependence is accompanied with a deep ambivalence. For many technology symbolises the faith of the postmodern world, but it is an ambivalent faith encapsulating both our hopes and fears for the future. This book examines the religious foundations underlying this troubled faith in technology, as well as critically and constructively engaging particular technological developments from a theological perspective.

**Political Illusion and Reality**-David W. Gill 2018-09-27 Are all governments--east and west, Muslim and secular, authoritarian and constitutional, Republican and Democratic--fundamentally the same, all of them under the extraordinary, growing power of "technique" and bureaucracy? Is all politics, then, just an illusory affair of lies, deception, propaganda, partisan passions, and chaos on the surface of government and party? In his vast and penetrating writings, Bordeaux sociologist Jacques Ellul (1912-1994) points in those directions. Political Illusion and Reality is a collection of twenty-three essays on Ellul's political thought. Veteran as well as younger Ellul scholars, political leaders, activists, and pastors, discuss aspects of Ellul's thought as they relate to their own fields of study and political experience. Beginning with his 1936 essay "Fascism, Son of Liberalism," translated and published here in English for the first time, Ellul and these authors will provoke readers to think some new thoughts about politics and government, and think more deeply about the main issues we face in our politically divided and troubled times.

**Canadian Idealism and the Philosophy of Freedom**-Robert Meynell 2011-05-18 Twentieth-century Canada fostered a range of great minds, but the country's diversity and wide range of academic fields have led to their ideas being portrayed as the work of isolated thinkers. Canadian Idealism and the Philosophy of Freedom contests this assumption by linking the works of C.B. Macpherson, George Grant, and Charles Taylor to demonstrate the presence of a Canadian intellectual tradition.
Staples and Beyond-Mel Watkins 2006-10-06 This collection brings together Watkins' most important scholarly articles. In Staples and Beyond Watkins addresses the "staple thesis" of Canadian economic and political development and, in particular, the effort to extend Harold Innis' work by giving more explicit consideration to class relations and the role of the state. He considers the historical nature of Canada's economic dependency in relation to tariff barriers, foreign investment, the multi-national corporation, and wide-ranging free trade and investment agreements. He also examines the evolution of economics and political economy as academic disciplines and reflects on the relationship between intellectual scholarship and political activism.

Dictionary Of Modern American Philosophers-John R. Shook 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers, and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields, before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.

Waiting at the Foot of the Cross-Pamela R. McCarroll 2013-12-24 How do we hope in the face of modernity's failure and postmodernity's absence of foundations? How do we hope when the future seems fearful and no clear way forward appears? How do we hope when despair, indifference, and cynicism dominate the psychic landscape of English-speaking North America? In dialogue with theologians of the cross George Grant and Douglas John Hall, this book unmasks the failure of hope in our time and the vacuum of meaning that remains. As an exercise in the theology of the cross, Waiting at the Foot of the Cross explores the North American context as one in which true hope is discovered only when life's negations are engaged from a posture of waiting trust. Such hope is not passive or blind. Rather, it is attentive, active, open, and spiritually grounded in the One who meets us when all hope is spent. The final chapter proposes a way toward hope for today that inspires subversive resilience in the face of the ambiguities and vicissitudes of life. Readers interested in the theology of the cross, in thinking theologically in our time and place, and those interested in the character of Christian hope will find this book compelling.
Philosophy and Freedom - David Peddle 2003-01-01 Commentaries on his intricate works by twelve former colleagues and students explore various aspects of Doull's history and place it within the context of contemporary scholarship, allowing the reader to judge the depth and rigour of Doull's writing.

Moving Images of Eternity - William F. Pinar 2019-03-26 William F. Pinar presents a comprehensive and original study that demonstrates the significance and pertinence of the scholarship of George Grant for teaching today. While there are studies of Grant’s political philosophy, there has been no sustained study of his teaching. Pinar not only draws upon the collected works; he has also consulted Grant’s PhD thesis at Oxford, as well as the philosopher’s biography, collected letters, and the vast secondary literature. What emerges is a treatise that reveals Grant’s timeliness and his prescience in identifying and critiquing key educational issues nearly half a century ago, from academic vocationalism and educational technology to privatization and the ascendency of research—issues that are eminently relevant today. Beyond the classroom, Grant’s concerns extended to the impact of economic globalization which, he feared, would erase distinctive national histories and cultures. As such, Grant foresaw the current issues of right-wing populism, notably in the UK and the US, as reactions against these historical tendencies. This volume is destined to become an indispensable reference work for students of Grant in particular and for students of education in general. This book is published in English.

Christ and Modernity - David J. Hawkin 2010-10-30 In this re-examination of the roots of the relationship between religion and science, David Hawkin focuses on the concept of autonomy as he explores the question: Is there continuity and compatibility between the autonomy that underlies Christian faith and the role of individual freedom in the technological age? What makes this work particularly...
valuable is Professor Hawkin’s review of the theological, philosophical, political, psychological, and sociological works that have formed our ideas of the nature of both Christianity and modernity — Reimarus, Strauss, Schweitzer, and Bultmann on the quest for the historical Jesus; Bauer and Turner on Christian faith and practice; Machiavelli, Nietzsche, Darwin, Freud, and Marx on our historicity; Gogarten, Cox, and Bonhoeffer who affirm our autonomy in the technological process; Ellul and George who deny it.

**Christianity and Liberal Society**-Robert Song 2006-01-13 Liberalism forms the dominant political ideology of the modern world, but despite its pervasive influence, this is the first book-length treatment of liberal political thought from a Christian theological perspective. Song discusses the different aspects and interpretations of liberalism with reference to the critiques of three twentieth-century theologians: the American Protestant Reinhold Niebuhr on the liberal progressivist philosophy of history; the lesser-known Canadian George Grant on the threat of technology to fundamental liberal values, as articulated in the recent work of John Rawls; and the French Thomist Jacques Maritain on the defence of political pluralism. Further to this, Song explores the implications of this political theology for the issues in fundamental constitutional theory raised by a bill of rights and judicial review of legislation, and concludes with an account of the critical but supportive stance of liberalism Christian theology should take.

**By Loving our Own**-Peter C. Emberley 1990-11-15 This first retrospective following Grant's death examines the significance of his major work, Lament For a Nation. The essays by philosophers, artists, theologians, political scientists and Canadian nationalists assess the impact of this important Canadian's work, and the intellectual legacy he has left behind.

**Political Visions & Illusions**-David T. Writing with broad international perspective, Koyzis is a sensible guide for Christians working in the public square, culture watchers, and all students of modern political thought.

**Leo Strauss and Anglo-American Democracy**-Grant Havers 2013-10-15 "Interprets Leo Strauss's political philosophy from a
conservative standpoint and argues that Strauss was a Cold War liberal. Suggests inattention to Christianity is crucial to the Straussian portrayal of Anglo-American democracy as a universal regime whose eternal ideals of liberty and constitutional government accord with the teachings of Plato and Aristotle, rather than the Gospels--

**Democratic Theory and Technological Society**-Richard B. Day 2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology, and how can democratic theory best respond to, or at least reflect on, those challenges? Inhabiting the kind of technologically advanced era in which we live, what sources are available within political theory for theoretical insight concerning the problem of democratic engagement with technology? The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions, including Hegel and Marx, Rousseau and John Dewey, Heidegger and Simone Weil, Habermas and Walter Benjamin, Hannah Arendt and Hans Jonas. Commentaries on all these important thinkers -- focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life -- yields rich and ambitious resources for theoretical reflection.

**Thinking Through Technology**-Carl Mitcham 1994-10-15 This introduction to the philosophy of technology discusses its sources and uses. Tracing the changing meaning of "technology" from ancient times to the modern day, it identifies two important traditions of critical analysis of technology: the engineering approach and the humanities approach.

**Beyond Cutting Edge**-Paul C. Heidebrecht 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change. As a myriad of articles and advertisements demonstrate, not only are we preoccupied with technology, but we are bombarded with numerous reminders that the cutting edge is in constant motion. Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest. Indeed, it is often assumed that the church has no choice but to find ways to cope with its new technological context. This book does not make the same assumptions. Building on the work of Mennonite theologian John Howard Yoder, it argues that the practices of the church make it possible for Christians to conscientiously engage technology. This happens when we recognize that marks of the church such as patience, vulnerability, and servanthood can put technological ideals such as speed, control, and efficiency in their proper place. In the course of
grappling with three examples of morally formative technologies--automobiles, genetically modified food, and the Internet--this book goes beyond Yoder's thought by emphasizing that the church also plays a crucial role in our moral formation.

The End of Ethics in a Technological Society-Lawrence E. Schmidt 2008-02-06 This book offers a bold challenge to modern liberal ethics by exposing its inability to confront the inexorable advance of technology. Contemporary books on technology generally fall into three categories: those that offer optimist projections of a glorious future, those that provide radical critiques of specific techniques, and those that express alarm about the dehumanizing effects of a culture dominated by technology. The End of Ethics in a Technological Society offers a deeper assessment of the modern West's commitment to technological progress. It argues that modern technology, ethics, and politics are all expressions of the enlightenment view that there are no principles of truth or goodness higher than the free human will. Technological advances are, on this view, merely extensions of the range of human freedom. Modern ethics thus fails to give voice to our often inchoate moral intuition that, in the realm of techno science, some possibilities simply ought not to be pursued. The authors develop their challenge by examining typical ethical approaches to such urgent contemporary concerns as environmental degradation, nuclear energy, high tech militarism, and fetal genetic testing. They relate our social crises to the transformation of ethics that has taken place as technology has become the house in which we all live.

Leo Strauss and His Legacy-John Albert Murley 2005 With close to 15,000 entries, this bibliography is the most comprehensive guide to published writing in the tradition of Leo Strauss, who lived from 1899 to 1973 and was one of the most influential political philosophers of the twentieth century. John A. Murley provides Strauss's own complete bibliography and identifies the work of hundreds of Strauss's students and their students' students. Leo Strauss and His Legacy charts the path of influence of a beloved teacher and mentor, a deep and lasting heritage that permeates the classroom of the twenty-first century. Each new generation of students of political philosophy will find this bibliography an indispensable resource.

Political Order and the Plural Structure of Society-James W. Skillen 1991 This excellent volume explores three forms of pluralist theory -- those based on historical doctrines of custom and tradition, Catholic doctrines of natural law and subsidiarity, and Calvinist
doctrines of sphere sovereignty and creation -- and compares and evaluates each of these forms of pluralism within the context of American thought.
