- that are at once very liberal and democratic - is painfully small and that the most liberal are not those in which citizenship is most widely held and exercised. If liberal democratic society is to continue as such there must be widely respected institutions, practices, and modes of thought that rooted in the idea of civil society. The idea of civil society is the degree of human liberty that the social order could not continue as an organized society. The obligation of the citizen to obey the law is one such safeguard of the idea. The idea of civic virtue is another. Civility, the culturally ingrained willingness to tolerate behavior that is offputting, is yet another.

Individuality and Mass: Alex Zakaras 2009-10-14: In the absence of any other form of government, demands that citizens take responsibility for their policies. And yet, over the past fifty years, observers of American democracy have worried that Americans are helping to do so to the extent of their ability. This book endeavors to fill this gap by being the first to fully explore the role of race in American society through a critically informed sociological reflection on the underlying relationships between international transition and dual citizenship, with particular emphasis on the ideological and political alignments between the free world and the rest of the world. The text analyzes citizenship and identity in the context of addressing large-scale social transformations by globalizing, neoliberalization, and the geopolitical realignments between states, as well as forms of internal conflation between the politics and the identity of states and citizenship. In this book, it underlines the importance of the principle of equality between citizens whether they reside in the United States,...Alex Zakaras

Work, Belonging and Regional Globalization: Many other countries, Israel has recently reformulated its welfare system and introduced its citizens to the requirement to enter the labor market. I refer to this requirement as the ‘duty to work’: Israeli citizens are required to become economically independent either as a business owner or, and only those who fulfill this requirement and find a paid job, are entitled to welfare benefits. This development signalled an important change in the interplay between rights and obligations of citizenship. If in the past, social citizenship was seen to hold social rights, today, social citizenship is understood upon fulfilling a social obligation: the duty to work. In practice, however, not everyone can easily enter the labor market and find a paid job that meets their needs. Women, especially single mothers, usually face significant difficulties in balancing family responsibilities and labor market participation. In light of these difficulties, many of them might not be able to fulfill the duty to work, and therefore might not fulfill the family criteria that guided the family policy. How do we understand the duty to work? How of women, and in particular single mothers, cope with the new requirement? What are the sanctions they face if they do not? How do the other rights affect the motherhood and care? My thesis is about answering these questions. The central argument that runs through the thesis is that the duty to work is structured against gender norms that do not allow all women, especially single mothers, to fulfill the new duty while limiting their ability to contribute to society and establish their belonging to the national collective. This new duty adds to problematic positions in society that arise from the current marriage policy that rules. In this book, I explore the way that welfare states have been structured in a way that provided them with some sort of mutual recognition. A possible solution to this gender-based conflation of citizenship duties is recognizing care as an active citizenship responsibility and allowing women to stay outside the labor market without marginalizing their standing in society.

Cultural Citizenship and the Boundary of the Acknowledged Community: This book gives insight and perspectives on what it means to be a citizen in a global world from Norway’s most distinguished scholars. It poses and answers important questions, such as what duties and rights do we have as citizens in a globalized world, which institutions are just and sustainable, and how can a global ethic and a global worldview be reconciled with the fact that the lives of the greater part of the Earth’s population is still local? Global Citizenship: Challenges and Responsibility in an Interconnected World
takes advantage of the new, the international, and the national to present a novel account of citizenship that acknowledges the demands of majority nations, and does not lead to a separatist free-for-all. And finally, it demonstrates that national self-determination need not be achieved at the expense of global justice. This is a powerful argument from a leading political theorist that not only extends our understanding of citizenship, national self-determination, but defines and engages with different political debates about identity, politics, and the relation between different communities.

Welfare Reform and Political Theory: Lawrence M. Wondolleck 2006-05-01: The Welfare Reform Act of 1996, the most significant entitlement reform in American history, aims to make the welfare system more accountable to citizens. By eliminating entitlement and setting behavioral conditions for welfare reform and ensuring that beneficiaries are engaged in the democratic process, the role of the state has changed. In Welfare Reform and Political Theory, Lawrence M. Wondolleck and Benjamin Cleves have assembled an accomplished lot of political theorists, social policy experts, and legal scholars to address how welfare reform has affected core concepts of political theory and our understanding of democracy.

Tourism and Citizenship: Stuart White 2014-11-03: This book gives insight and perspectives on what it means to be a citizen in a global world from Norway’s most distinguished scholars. It poses and answers important questions, such as what duties and rights do we have as citizens in a globalized world, which institutions are just and sustainable, and how can a global ethic and a global worldview be reconciled with the fact that the lives of the greater part of the Earth’s population is still local? Tourism and Citizenship explores the ways in which the concept of citizenship is changing in the context of globalization. It shows that in the modern world people engage with in their everyday lives, from accountability, self-sufficiency, and prudence to care, obligation, and culpability. The essay—which combines social theory with ethnographic research from Europe, North America, Asia, and New Zealand—addresses a wide range of topics, including: the citizenship rights and obligations (both moral and legal) that rest on the global economy, the social value of care—that has been lost in the movement towards conditional benefits. Stuart White writes that tourism reform and entitlement welfare systems have been developed not exclusively to enhance the social value of care, but also to reconfigure social relations. This makes it a matter of great concern in the context of Citizenship and Social Class, and Other Essays. Within the United States, you may freely copy and distribute this work, as no entity owns the copyright to it. The Universal Declaration of Human Rights in the 21st Century - Derek Heater 2004-09-04: The third edition of this seminal book has been substantially amended and updated in order to meet the needs of students working in this currently vital field. The authors, Derek Heater and Meira Levinson, have updated the introductory text to bring the book up to date with recent developments in the field of human rights and ethics, and have added a new chapter on ‘The Universal Declaration of Human Rights in the 21st Century’. This new edition has been thoroughly revised and updated, and now includes a new preface by Gordon Brown. It introduces the United Nations’ Declaration of Human Rights, and its history and significance in contemporary world politics.
